How to Trade EOS Futures on BTCC

Original:

<https://www.btcc.com/en-US/academy/crypto-basics/how-to-trade-eos-futures-on-btcc>

[EOS](#) is a blockchain protocol developed by BM (Daniel Larimer). The main goal is to support business by enabling high-performance and high-security blockchain-based application to be build on the open source smart contract platform. EOS has raised 4 billion US dollars in one year and is currently the largest ICO project. In 2018, EOS was once regarded as Blockchain 3.0, and has set off a wave of TPS boom due to its vision of achieving one million TPS.

However, a series of problems emerged such as the high threshold to use EOS, and complicated technology. BM later developed other new projects, and project parties have been criticized for raising funds to buy treasury bonds. The current views toward the project is very polarized. EOS is currently quoted at a price of US\$3.02. In 2020, the price of EOS increases 9.60%.

You can buy EOS at a low price and sell at a high price to invest in EOS. However, this method is only effective when the EOS price rises.

BTCC cryptocurrency derivatives [margin trading](#) platform can solve these shortcomings. EOS futures allow you to benefit from EOS fluctuations. In addition, these derivative have built-in leverage, you can use small capital to trade large transactions.

What are EOS Futures ?

With EOS Futures, buyers and sellers agree on a futures contract that specifies a future price and delivery date for the cryptocurrency. The value of the futures contract is based on the price of EOS, the underlying cryptocurrency. As a result, the value of a futures contract on EOS generally follows the value of EOS itself.

Futures trading provides an alternative to direct cryptocurrency exchange (aka spot trading). Buying EOS at a low price and selling it at a high price might be profitable in spot trading. However, you can only make money with this transaction if the EOS price is rising. However, spot trading is unavailable during a down market. In addition, in spot trading, you cannot use leverage.

Futures trading in EOS has various benefits over spot trading in EOS, including the opportunity to long or short and access to leverage.

Why Trade EOS Futures on BTCC

To trade EOS futures, you can choose BTCC crypto exchange. [BTCC](#) was founded in June 2011 with the goal of making crypto trading reliable and accessible to everyone.

We specialize in crypto futures contract trading, offering perpetual futures contracts. The maximum leverage offered by BTCC for daily futures contracts is 150x. The vast variety of futures offered by BTCC accommodates the trading habits and objectives of both novice and seasoned traders. We offer the USDT-margined futures and Coin-margined futures. Users can trade futures using USDT or cryptos like BTC, ETH, and XRP. And Large orders of up to 300 BTC can be executed at the top price levels.

Here are the main advantages of using the BTCC crypto exchange to trade EOS futures:

- Largest variety of futures: Daily and Perpetual futures
- Flexible leverage from 10x to 150x
- Lowest trading fees 0.03%
- Industry-leading market liquidity
- Plenty of campaigns to win exciting rewards

How to Trade EOS Futures on BTCC

STEP 1: Open the BTCC margin interface

STEP 2: Choose the type of EOS margin trading

STEP 3: Choose the EOS order type

STEP 4: Choose the leverage level

STEP 5: Choose the lot size

STEP 6. Set the take profit and stop loss price

STEP 7. Choose price direction: Buy when bullish, Sell when bearish

STEP 1: Open the BTCC margin trading interface

Log in to the official website of [BTCC.com](https://www.btcc.com) and click Margin Trading on the main menu.

If you have not opened an account with BTCC, [click here](#) to quickly register a free account and top up the initial amount. You can deposit at least 2 USDT for an attempt. If the deposit amount is greater than 500 USDT, you can receive up to [2,000 USDT bonus](#).

STEP 2: Choose the type of EOS margin trading

Select the weekly contract or perpetual contract of EOS at the top of the page.

STEP 3: Choose the EOS order type

Select the BTCC margin trading order type at the top right of the page. BTCC margin trading orders are divided into market orders, limit orders and stop loss orders.

The screenshot displays a trading interface with a dark theme. At the top, three order types are listed: "Market order" (with a question mark icon), "Limit order" (with a question mark icon), and "Stop order" (with a question mark icon). The "Market order" option is highlighted with a red border and a blue underline. Below this, there are two columns for order configuration. Each column has a "Leverage" dropdown set to "50x", a "Most Favorable Price" button, a quantity input field set to "100", and a "Set Stop-Limit" toggle switch. At the bottom of each column, there are two rows of summary information: "Contract value" (258.32USDT for Buy, 257.94USDT for Sell) and "Reference margin" (6.00USDT for both). At the very bottom, there are two large buttons: a green "Buy (EOS/USDT)" button and a pink "Sell (EOS/USDT)" button.

- **Market orders:** Users place orders at the best current price in the market to achieve fast trading.
- **Limit order:** A limit order is used to copy the top/bottom, and refers to a buy/sell price set by the user. After the market reaches the limit price, the margin trading can be executed.
- **Stop Order:** A stop order is an advanced limit order, and users can customize a buy/sell price. After the market reaches the limit price, the margin trading can be executed.

STEP 4: Choose the leverage level

Leverage multiples can be adjusted by themselves. For example, EOS's weekly contract and perpetual contract provides 10x, 20x and 50x leverages.

Market order ? **Limit order** ? **Stop order** ?

| | |
|---|---|
| Leverage 50x ▼ | Leverage 50x ▼ |
| Most Favorable Price | Most Favorable Price |
| - 100 + | - 100 + |
| Set Stop-Limit <input type="checkbox"/> | Set Stop-Limit <input type="checkbox"/> |
| Contract value 258.32USDT | Contract value 257.94USDT |
| Reference margin 6.00USDT | Reference margin 6.00USDT |
| Buy (EOS/USDT) | Sell (EOS/USDT) |

STEP 5: Choose the lot size

The EOS trading unit can choose the number of lots according to the user's investment situation, and the range can be selected from 1 to 10000 lots. There are real-time contract values and reference margins below.

| Market order [?] | | Limit order [?] | | Stop order [?] | |
|---|------------|---|------------|---|------------|
| Leverage 50x ▼ | | Leverage 50x ▼ | | Leverage 50x ▼ | |
| Most Favorable Price | | Most Favorable Price | | Most Favorable Price | |
| - 100 + | | - 100 + | | - 100 + | |
| Set Stop-Limit <input type="checkbox"/> | | Set Stop-Limit <input type="checkbox"/> | | Set Stop-Limit <input type="checkbox"/> | |
| Contract value | 258.32USDT | Contract value | 257.94USDT | Contract value | 257.94USDT |
| Reference margin | 6.00USDT | Reference margin | 6.00USDT | Reference margin | 6.00USDT |
| Buy (EOS/USDT) | | Sell (EOS/USDT) | | Sell (EOS/USDT) | |

STEP 6. Set the take profit and stop loss price

Market orders, limit orders and stop orders all need to set a take-profit and stop-loss price. The difference is that market orders are executed immediately at the best current price, while limit orders and stop orders need to be set for the same day or a week.

| Market order [?] | | Limit order [?] | | Stop order [?] | |
|--|--------|--|---|-------------------------|---|
| Leverage 50x ▾ | | Leverage 50x ▾ | | | |
| Most Favorable Price | | Most Favorable Price | | | |
| - | 100 | + | - | 100 | + |
| Set Stop-Limit <input checked="" type="checkbox"/> | | Set Stop-Limit <input checked="" type="checkbox"/> | | | |
| - | 2.5823 | + | - | 2.7815 | + |
| - | 2.7847 | + | - | 2.5804 | + |
| Contract value 258.70USDT | | Contract value 258.32USDT | | | |
| Reference margin 6.00USDT | | Reference margin 6.00USDT | | | |
| Buy (EOS/USDT) | | Sell (EOS/USDT) | | | |

STEP 7. Choose price direction: Buy when bullish, Sell when bearish

After setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Note that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform. Click the buy or sell button, and the EOS order is completed.

Market order ? **Limit order** ? Stop order ?

| | | | |
|-----------------------|---|------------------------|---|
| Leverage | 50x ▼ | Leverage | 50x ▼ |
| - | 2.5785 | + | - |
| - | 100 | + | - |
| Valid period | <input checked="" type="radio"/> Weekly <input type="radio"/> Daily | Valid period | <input checked="" type="radio"/> Weekly <input type="radio"/> Daily |
| Set Stop-Limit | <input checked="" type="checkbox"/> | Set Stop-Limit | <input checked="" type="checkbox"/> |
| - | 2.5793 | + | - |
| - | 2.7813 | + | - |
| - | 2.5788 | + | - |
| - | 100 | + | - |
| - | 2.7822 | + | - |
| - | 2.5802 | + | - |
| Contract value | 258.05USDT | Contract value | 257.68USDT |
| Reference margin | 6.00USDT | Reference margin | 6.00USDT |
| Buy (EOS/USDT) | | Sell (EOS/USDT) | |

Finally, after the margin trading is completed, it will be displayed at the bottom of the position page; if there is no trading to be executed, it will be displayed at the bottom of the pending order page.

| Position | Pending order | Transactions Daily | P&L Daily | <input checked="" type="checkbox"/> All | <input type="checkbox"/> Per | More>> | |
|---|-------------------|--------------------|-----------|---|------------------------------|--------|-----------|
| Symbol | Position order no | Direction | Amount | Open price(USDT) | Close price(USDT) | F | Opetation |
|  <p>No record yet!</p> | | | | | | | |
